

## Mobile fall arrester

### Description:

Designed for use on the entire range of **SECURIFIL® verticale** lifelines on a galvanized or stainless-steel cable with a diameter of 8 mm 7x19. Integration of an energy absorber and a double action opening system & anti-inversion for more security.

For a user of 50 kg (equipment not included) up to 140 kg (equipment included).

### Advantages

The SKC H04 EVO fall arrester can be used and is certified on all **SECURIFIL® verticale** versions.

The SKC H04 EVO is an individual P.P.E. that is used attached to a harness compliant to EN-361 (see opposite drawing).

Traceability by unique serial number and production date.

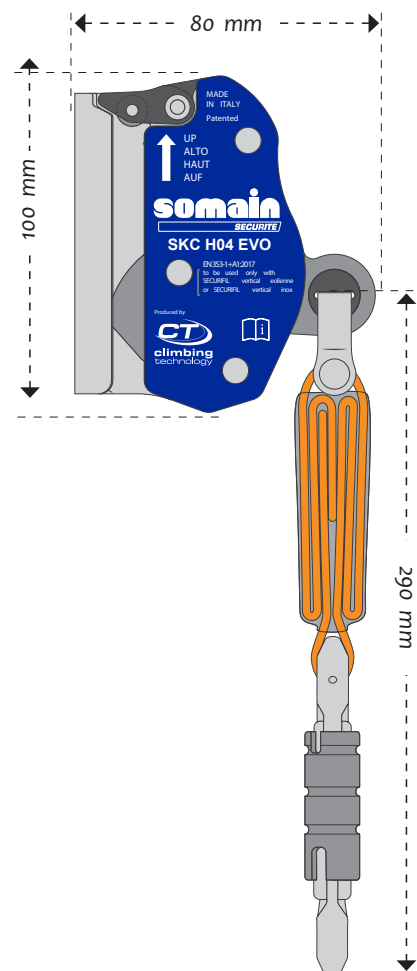

### Details:

**Material:** Inox / Aluminium / Textile

**Certificate of Conformity on:**

<https://www.somain.fr/documents/ddcskcho4evo.pdf>
