Fixation on insulated terrace

Description:

The **SECURILISSE® GC-TI** is a collective system against falls from heights, designed for roofs that are inaccessible to the public and for installation on concrete slabs through the insulation. Waterproofing is preserved thanks to the combination of two collars fitted to the guardrail uprights.

Details:

Material: Aluminium

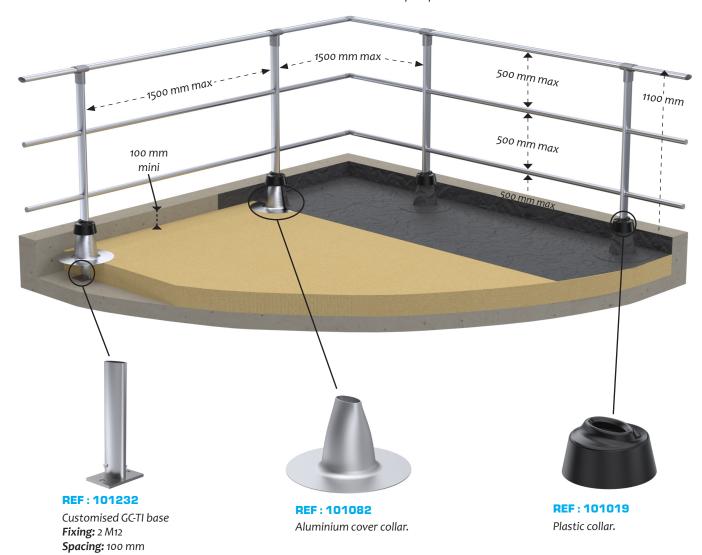

Finish: Raw, anodised or powder-coated

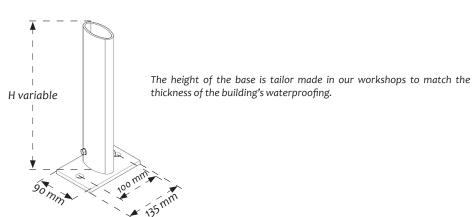

Available version: Straight or inclined

Setup: Delivered with manuals and drawings available online at: http://extranet.somain.fr

1 Straight guardrail with midrails: GC-TID

The **SECURILISSE® GC-TID** is used for an installation on concrete terrace with a parapet of 100 mm min.

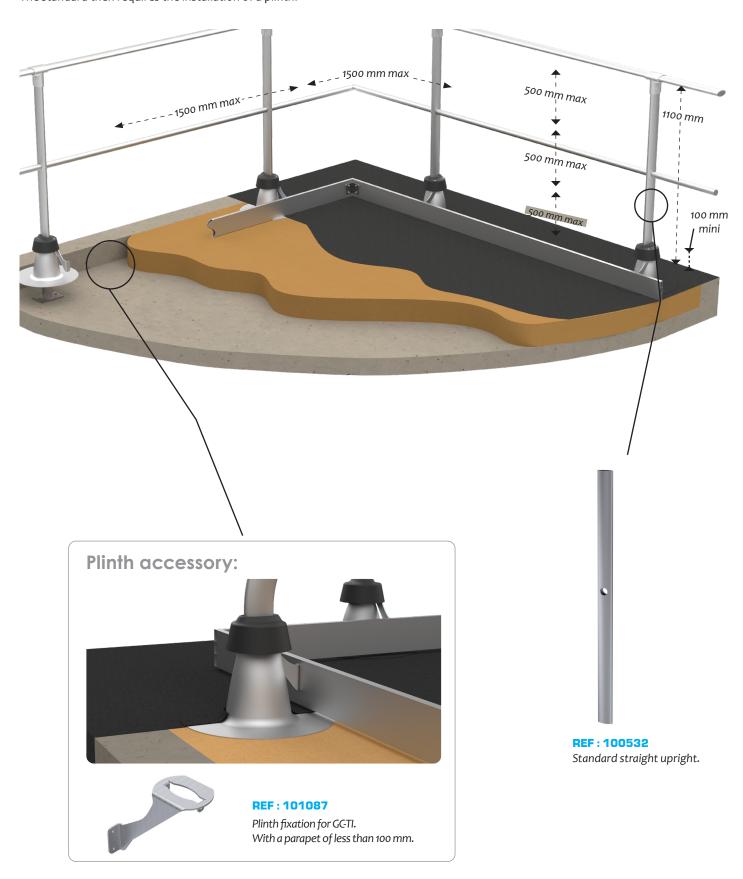

Straight guardrail with midrail and plinth: GC-TID.P.

The **SECURILISSE**® **GC-TID.P** is suitable for work areas on insulated concrete terraces without a parapet or one of less than 100 mm. The standard then requires the installation of a plinth.

Fixation on insulated terrace

Description:

The **SECURILISSE® GC-TI-I** is a collective system against falls from heights, designed for roofs that are inaccessible to the public and for installation on concrete slabs through the insulation.

The waterproofing is preserved thanks to the combination of two collars fitted to the guardrail's uprights. The 30-degree inclined version is chosen for aesthetic reasons as it is less visible from the ground.

Details:

Material: Aluminium

Finish: Raw, anodised or powder-coated

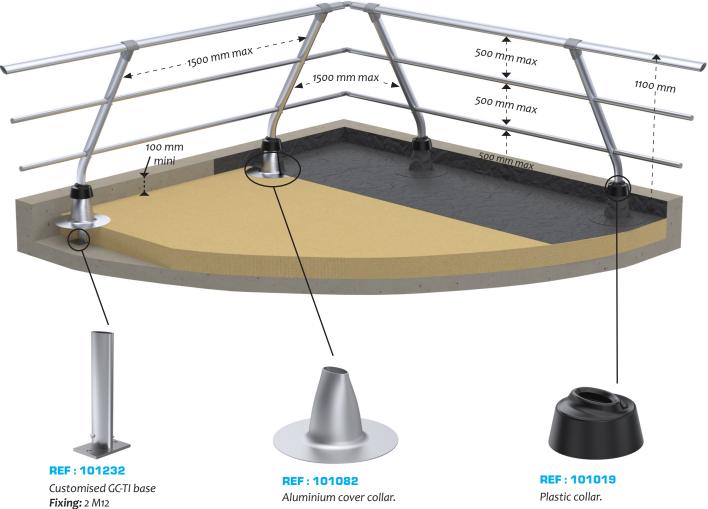

Available version: Straight or inclined

Setup: Delivered with manuals and drawings available online at: http://extranet.somain.fr

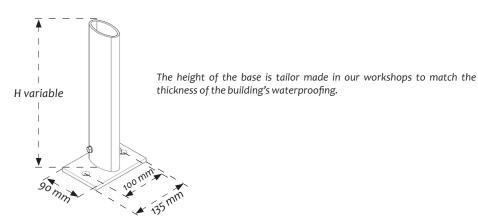

1 Inclined guardrail with midrails: GC-TI-I

The **SECURILISSE® GC-TI-I** is used for an installation on concrete terrace with a parapet of 100 mm min.

2 Inclined guardrail with midrails and plinth: GC-TI-I.P

The SECURILISSE® GC-TI-I.P is suitable for work areas without a parapet or one of less than 100 mm. The standard then requires the installation of a plinth.
