

Rigid lifeline for suspension work

Description:

SECURILIGNE® tubalurail is a rigid aluminium lifeline. The exclusive profile developed by SOMAIN allows distances between fixations of up to 4.50m (more on request). Ideal for use on the underside, this lifeline can also be used for suspension work thanks to a trolley designed for this purpose.

It is also suitable for photovoltaic roofs as the corrugation spans are kept to a minimum.

Details:

Material: Aluminium

Finish: raw, anodised or powder-coated

Setup: Delivered with manuals and drawings
available online at: <http://extranet.somain.fr>

REF : 100721

Tubalurail V2 profile, length 6 m or 3 m.

Section: 105 x 50 mm

Span: 4.50 m max

Options

Specific RAL colour on request.

The curves are made by bending the profile with a minimum radius of 800 mm.
